PROFESSIONAL SUMMARY

Analytics leader with 7+ years of applied data science turning ambiguous business questions into hypothesis-driven analyses and decision-ready recommendations. Builds KPI frameworks, predictive models, and automated SQL/Python pipelines that track performance and outcomes. Partners cross-functionally to implement recommendations, mentors analysts, and presents clear findings to senior leadership.

EDUCATION

University of San Francisco
Bachelor of Science - Physics

EXPERIENCE

Manager of Analytics, Counterparty Risk **February 2026 – Present**
Aqua Finance, Inc. *Remote*

- Manage and mentor a Junior Analyst, and partner with Credit, Operations, Sales, Underwriting, and Data Engineering to translate business needs into scalable risk monitoring solutions
- Built counterparty risk frameworks, KPIs, early-warning indicators, and predictive models to monitor credit and fraud risk across dealers and applications
- Develop automated SQL/Python analytics pipelines and reporting, improving timeliness, consistency, and scalability of portfolio risk monitoring

Sr. Risk Analyst **June 2021 – February 2026**
Solar Mosaic LLC *Remote/Oakland, CA*

- Developed SQL/Gephi network analysis using IP, geographic, and business-registration data to identify risk and fraud among connected entities
- Built an XGBoost dealer offboarding model to predict each dealer's probability of becoming offboarded at different time horizons (3M, 6M, 12M)
- Implemented dynamic partner risk scorecards, daily-updating schemas, alerts, and data initiatives with Data Engineering using DBT, Apache Airflow, AWS, and Snowflake

Lead Software Developer (Contract) **October 2019 – June 2021**
L-Egant Solutions, LLC *Irvine, CA*

- Developed scripts and GUI software for high-frame-rate camera operation, video capture, image algebra, pixel-intensity analysis, and two-dimensional Gaussian characterization

Data Analyst, Portfolio & Servicing Risk **August 2019 – June 2021**
Mechanics Bank Auto Finance *Irvine, CA*

- Applied K-means, hierarchical clustering, and Random Forest models to segment collection agents, analyze credit metrics, inform credit policy, and forecast portfolio losses

PROJECTS

when-where travel.iesepulveda.com
Full-Stack Travel Recommendation Engine

- **Data Sources:** REST APIs (World Bank Data360, Eurostat, Open-Meteo, Overpass) and web scraping (MICHELIN Guide) to build destination-scoring datasets
- **Pipeline:** Python ETL to clean, merge, and reconcile heterogeneous structured/unstructured data (weather, economic, crime, tourism) across inconsistent country/city coding schemes

dft (Duty Free Tracker) dft.iesepulveda.com
Full-Stack Airport Shopping Data Platform

- **Frontend:** Next.js/TypeScript — user login, favorites, interactive maps, image upload
- **Backend:** Supabase/Postgres — relational schema (Airport, Store, Sighting, Product, Brand)

SKILLS

Languages & Libraries: Python, SQL, R, LaTeX, Java, Matplotlib, Mayavi, ggplot2, pandas, scikit-learn
Tools & Platforms: Tableau, DBT, Airflow, Docker, AWS, Snowflake, GitHub, Bitbucket, Gephi
Methods: Hypothesis Testing, Experimental Design, Forecasting, XGBoost, Random Forest, KNN/K-Means
